RE: Summer Bio-solids 2022 PFAS Order No.: 2205034

Dear Mr. Shawn Wheat: Guide to reading Lab Result

Prein&Newhof Laboratory received 1 sample(s) on 5/2/2022 on your behalf. Your test results are provided in your Prein&Newhof Laboratory analytical report. Please carefully review your analytical report, noting the following.

There were no problems with the analytical events associated with this report unless noted in the Case Narrative.

Any analyte that exceeds the client provided permit level are noted on the report with an "\*" in the Qual field. Quality control data is within laboratory defined or method specified acceptance limits except if noted.

When testing for PFHxS, PFOA, PFOS, MeFOSAA, and EtFOSAA results include both branched and linear isotopes. We extract a Method Blank and analyze it with the preparation batch. Method Blank analytes are within the Reporting Limit (RL).

To learn more about interpreting your Lab Report, follow the link above to view our "Guide to Reading Lab Results". If you have any concerns about your test results or need additional help, please call: 616-364-7600 or email me: sbylsma@preinnewhof.com.

We use EPA Approved Methods for all regulated parameters. EPA Lab #: MI000014

Thank you for trusting Prein&Newhof with your testing needs.

Thank you for your business.

Sincerely,

Steve Bylsma

Str. m. Doglar

Laboratory Manager

### **General Report Notes**

Analytical results relate only to the samples tested, in the condition received by the laboratory.

Methods may be modified for improved performance.

Results reported on a dry weight basis where applicable.

'Not detected' indicates that parameter was not found at a level equal to or greater than the reporting limit (RL).

When MDL results are provided, then 'Not detected' indicates that parameter was not found at a level equal to or greater than the MDL.

40 CFR Part 136 Table II Required Containers, Preservation Techniques and Holding Times for the Clean Water Act specify that samples

for acrolein, acrylonitrile, and 2-chlorovinylethyl ether need to be preserved at a pH in the range of 4 to 5 or if not preserved, analyzed within 3 days of sampling.

QA/QC corresponding to this analytical report is a separate document with the same Merit ID reference and is available upon request.

Full accreditation certificates are available upon request. Starred (\*) analytes are not NELAP accredited.

Samples are held by the lab for 30 days from the final report date unless a written request to hold longer is provided by the client.

Report shall not be reproduced except in full, without the written approval of Merit Laboratories, Inc.

Limits for drinking water samples, are listed as the MCL Limits (Maximum Contaminant Level Concentrations)

PFAS requirement: Section 9.3.8 of U.S. EPA Method 537.1 states "If the method analyte(s) found in the Field Sample is present in the

FRB at a concentration greater than 1/3 the MRL, then all samples collected with that FRB are invalid and must be recollected and reanalyzed."

Samples submitted without an accompanying FRB may not be acceptable for compliance purposes.

Wisconsin PFAs analysis: MDL = LOD; RL = LOQ. LOD and LOQ are adjusted for dilution.

### **Qualifier Descriptions**

| Qualifier | Description   |
|-----------|---|
| !         | Result is outside of stated limit criteria                            |
| В         | Compound also found in associated method blank                        |
| E         | Concentration exceeds calibration range                               |
| F         | Analysis run outside of holding time                                  |
| G         | Estimated result due to extraction run outside of holding time        |
| Н         | Sample submitted and run outside of holding time                      |
| 1         | Matrix interference with internal standard                            |
| J         | Estimated value less than reporting limit, but greater than MDL       |
| L         | Elevated reporting limit due to low sample amount                     |
| M         | Result reported to MDL not RDL  |
| 0         | Analysis performed by outside laboratory. See attached report.        |
| R         | Preliminary result  |
| S         | Surrogate recovery outside of control limits                          |
| Т         | No correction for total solids  |
| X         | Elevated reporting limit due to matrix interference                   |
| Υ         | Elevated reporting limit due to high target concentration             |
| b         | Value detected less than reporting limit, but greater than MDL        |
| е         | Reported value estimated due to interference                          |
| j         | Analyte also found in associated method blank                         |
| р         | Benzo(b)Fluoranthene and Benzo(k)Fluoranthene integrated as one peak. |
| x         | Preserved from bulk sample  |

| Selection           |       | Description  | Note                        |
|---------------------|-------|--|-----------------------------|
| Sample Receiving    |       |  |                             |
| 01. X Yes No        | N/A   | Samples are received at 4C +/- 2C Thermometer #        | IR 5.8                      |
| 02. X Yes No        | N/A   | Received on ice/ cooling process begun                 |                             |
| 03. X Yes No        | N/A   | Samples shipped  | UPS                         |
| 04. Yes X No        | N/A   | Samples left in 24 hr. drop box                        |                             |
| 05. X Yes No        | N/A   | Are there custody seals/tape or is the drop box locked |                             |
| Chain of Custody    |       |  |                             |
| 06. X Yes No        | N/A   | COC adequately filled out                              |                             |
| 07. <b>X</b> Yes No | N/A   | COC signed and relinquished to the lab                 |                             |
| 08. <b>X</b> Yes No | N/A   | Sample tag on bottles match COC                        |                             |
| 09. Yes <b>X</b> No | N/A   | Subcontracting needed? Subcontacted to:                |                             |
| Preservation        |       |  |                             |
| 10. <b>X</b> Yes No | N/A   | Do sample have correct chemical preservation           |                             |
| 11. Yes No X        | ₹ N/A | Completed pH checks on preserved samples? (no VOAs)    |                             |
| 12. Yes <b>X</b> No | N/A   | Did any samples need to be preserved in the lab?       |                             |
| Bottle Conditions   |       |  |                             |
| 13. <b>X</b> Yes No | N/A   | All bottles intact                                     |                             |
| 14. <b>X</b> Yes No | N/A   | Appropriate analytical bottles are used                | Centrifuge tubes overfilled |
| 15. <b>X</b> Yes No | N/A   | Merit bottles used                                     |                             |
| 16. <b>X</b> Yes No | N/A   | Sufficient sample volume received                      |                             |
| 17. Yes <b>X</b> No | N/A   | Samples require laboratory filtration                  |                             |
| 18. <b>X</b> Yes No | N/A   | Samples submitted within holding time                  |                             |
| 19. Yes No X        | ₹ N/A | Do water VOC or TOX bottles contain headspace          |                             |
|                     |       |  |                             |
|                     |       |  |                             |
|                     |       |  |                             |
|                     |       |  |                             |
|                     |       |  |                             |

| Corrective action for all exceptions is to call the client and to | notify the project manager. |
