#### **General Report Notes**

Analytical results relate only to the samples tested, in the condition received by the laboratory.

Methods may be modified for improved performance.

Results reported on a dry weight basis where applicable.

'Not detected' indicates that parameter was not found at a level equal to or greater than the reporting limit (RL).

40 CFR Part 136 Table II Required Containers, Preservation Techniques and Holding Times for the Clean Water Act specify that samples

for acrolein and acrylonitrile need to be preserved at a pH in the range of 4 to 5 or if not preserved, analyzed within 3 days of sampling.

QA/QC corresponding to this analytical report is a separate document with the same Merit ID reference and is available upon request.

Full accreditation certificates are available upon request. Starred (\*) analytes are not NELAP accredited.

Samples are held by the lab for 30 days from the final report date unless a written request to hold longer is provided by the client.

Report shall not be reproduced except in full, without the written approval of Merit Laboratories, Inc.

Limits for drinking water samples, are listed as the MCL Limits (Maximum Contaminant Level Concentrations)

PFAS requirement: Section 9.3.8 of U.S. EPA Method 537.1 states "If the method analyte(s) found in the Field Sample is present in the

FRB at a concentration greater than 1/3 the MRL, then all samples collected with that FRB are invalid and must be recollected and reanalyzed."

Samples submitted without an accompanying FRB may not be acceptable for compliance purposes.

#### **Report Narrative**

There is no additional narrative for this analytical report

#### **Laboratory Certifications**

| Authority           | Certification ID |
|---------------------|------------------|
| Michigan DEQ        | #9956            |
| DOD ELAP/ISO 17025  | #69699           |
| WBENC               | #2005110032      |
| Ohio VAP            | #CL0002          |
| Indiana DOH         | #C-MI-07         |
| New York NELAC      | #11814           |
| North Carolina DENR | #680             |
| North Carolina DOH  | #26702           |
| Alaska CSLAP        | #17-001          |
| Pennsylvania DEP    | #68-05884        |

#### **Qualifier Descriptions**

| Qualifier | Description   |
|-----------|---|
| !         | Result is outside of stated limit criteria                            |
| В         | Compound also found in associated method blank                        |
| E         | Concentration exceeds calibration range                               |
| F         | Analysis run outside of holding time                                  |
| G         | Estimated result due to extraction run outside of holding time        |
| Н         | Sample submitted and run outside of holding time                      |
| 1         | Matrix interference with internal standard                            |
| J         | Estimated value less than reporting limit, but greater than MDL       |
| L         | Elevated reporting limit due to low sample amount                     |
| M         | Result reported to MDL not RDL  |
| 0         | Analysis performed by outside laboratory. See attached report.        |
| R         | Preliminary result  |
| S         | Surrogate recovery outside of control limits                          |
| Т         | No correction for total solids  |
| X         | Elevated reporting limit due to matrix interference                   |
| Υ         | Elevated reporting limit due to high target concentration             |
| b         | Value detected less than reporting limit, but greater than MDL        |
| е         | Reported value estimated due to interference                          |
| j         | Analyte also found in associated method blank                         |
| р         | Benzo(b)Fluoranthene and Benzo(k)Fluoranthene integrated as one peak. |
| x         | Preserved from bulk sample  |

#### **Glossary of Abbreviations**

| Abbreviation | Description                              |
|--------------|--|
| RL/RDL       | Reporting Limit                          |
| MDL          | Method Detection Limit                   |
| MS           | Matrix Spike                             |
| MSD          | Matrix Spike Duplicate                   |
| SW           | EPA SW 846 (Soil and Wastewater) Methods |
